## FAQ'S

### What does StemPets® Advanced formula do?

StemPets Advanced Formula supports the natural release of adult stem cells from your pet's bone marrow. Adult stem cells are the "master" cells found in your pet's body after birth, most abundantly in the bone marrow. They form the very core of the body's natural renewal system for animals, just as they do for humans. Without them the natural renewal process of your pet's tissues and organs simply could not take place.

### Why do pets need StemPets Advanced Formula?

As your pets grow older, the number of circulating adult stem cells gradually decreases, leaving your furry friends more susceptible to injury and other health challenges. By supporting the natural release of adult stem cells from the bone marrow, StemPets Advanced Formula supports your pet's ongoing health.
